

EDUCATION FOR ENTERPRISE

'Enterprise' is all about thinking outside the square and is one of the four future focus issues in the new curriculum document. Education for Enterprise (E4E) is a vehicle for implementing the new curriculum and is a refreshing approach to teaching and learning across all curriculum areas that prepares young New Zealanders to be 'creative, energetic and enterprising'.

CORE works with principals and staff to create an enterprising school culture characterised by:

- Student-led learning
- Learning in authentic, real-world contexts
- Working in collaboration with your local community
- 21st century thinking and ways of working

OUR SERVICES:

We can design an Education for Enterprise approach for your school, as well as in-school support and facilitation for teachers and school leaders.

Tailored workshops for:

- School leaders
- Teachers
- Students

Tailored seminars for:

- Boards of Trustees
- Parents
- Business and community groups

ENTERPRISE CHAMPIONS NETWORK, EDUCATION FOR ENTERPRISE PILOT, 2006 - 2008

"The professional development [of the E4E programme]... has been invaluable in the process of extending an 'education for enterprise' attitude in the school.

This is particularly important as enterprising and entrepreneurial are part of the vision statement for New Zealand young people and enterprising is part of the 'managing self' key competency in the New Zealand curriculum document."

Theresa Shaughnessy
Principal, Avonside Girls' High School

"My students have learnt to communicate and apply their ideas and skills to meet the expectations of other people as 'real' clients, rather than only me as a teacher. I have learnt that networking with professionals, whether in business or education, enriches my vision for students and myself."

Lila Price
Teacher, Christchurch Boys' High School
